

Emergency Energy Surcharge Q3 2023

Dear Valued Customer,

As stated in previous communication regarding the Emergency Energy Surcharge, The Port of Helsingborg will review and amend the rate quarterly depending on the fluctuation in energy prices.

For the third quarter of 2023, the rate will remain unchanged at SEK 40.00 per handled unit. This applies to both laden and empty containers loaded or discharged to/from a vessel at The Port of Helsingborg.

The charge is based on the actual cost development from the baseline 2021 full year. See the table with details at the bottom of this page.

Today's primary sources of energy consumption for The Port of Helsingborg are Electricity and HVO 100, still at high levels vs 2021.

The energy surcharge is implemented as a measure to secure our level of service and to maintain an efficient and satisfying operation.

The Port of Helsingborg will continue to charge the energy surcharge with a separate invoice.

We thank you for your understanding and support and look forward to continuing to serve you and your logistic requirements.

Sincerely,
Port of Helsingborg
