

Emergency Energy Surcharge Q2 2024

Dear Valued Customer,

As stated in previous communication regarding the Emergency Energy Surcharge, The Port of Helsingborg will review and amend the rate on a quarterly basis depending on the fluctuation in energy prices.

For the second quarter of 2024 we have identified that the energy prices are back at similar level as our baseline 2021 hence in Q2 the Emergency Energy Surcharge will not be invoiced during this quarter and concerns both laden and empty containers that are loaded or discharged to/from vessel at The Port of Helsingborg during Q2.

The main sources of energy consumption for Port of Helsingborg today are Electricity and HVO 100

The Port of Helsingborg will continue to closely monitor the evolution of energy prices during Q2, Q3 and Q4 and the surcharge is subject to being applicable again in case energy prices once again increase. In case any changes we will communicate this accordingly and prior to each quarter.

We thank you for your understanding and support and look forward continuing serving you and your logistic requirements.

Sincerely,
Port of Helsingborg

Electricity prices

Reference: www.vattenfall.se
Electric area 4 – Southern Sweden
2021 average price: 0,94 SEK/kWh
(baseline)
2024 YTD average price: 0,84
SEK/kWh
Difference: -11 percent

HVO 100 prices

Reference: Internal
2021 average HVO 100 price:
14,06 SEK/Liter (baseline)
2024 YTD average HVO 100 price:
17,35 SEK/liter
Difference: +23,4 percent
